

# Trivers

In 1975, Trivers was founded in St. Louis on values that still characterize the firm today: creating architecture of lasting positive consequence.

In a city renowned for its historic architecture, but in need of restoration and fresh ideas, we established a reputation for thoughtful design that responded to context of St. Louis. Our early focus on historic renovation and adaptive reuse rapidly grew to include ground up construction.

Today, while continuing our commitment to St. Louis, we work for a range of clients across the country providing expertise in civic, education, hospitality, housing and workplace architecture while maintaining an intentional combination of historic renovation, adaptive reuse, and new construction.
